ABSTRACT

The COVID-19 pandemic has been the biggest test of the world since Second World War. The novel coronavirus (SARS-CoV-2) ailment causes severe respiratory issues. Nowadays, all the colleges and schools utilize e-learning processes to advance their studies. It has had a remarkable effect on the instruction area, where students are accustomed to going to these schools or universities. In any case, as the circumstance is beyond our control, the college has no alternative but to proceed. This will continue as an elective method of study in the post-pandemic circumstance. In the 21st century, computerized time and information communication technology (ICT) use in the study hall is fundamental for giving students different chances to learn. To procure the most elevated correspondence level in school guaranteed that modernized education learning process where data innovation as a subset of data and interchanges innovation. In this way, to keep up this convention, one should proceed with the e-assets, similar to google study hall, Microsoft teams, class in skype, or any other applications. The authors intended to provide brief knowledge about the COVID-19 pandemic; the international education system classification and need for global education systems have to transfer from traditional to digital platforms. The common problems involved in the digital learning platform, irrespective of the system's international educational classification, have concluded.

1. INTRODUCTION

Coronavirus un-wellness (COVID-19) could be an uncommon coronavirus with sturdy infectiousness and high mortality. According to a cluster of cases of the urban center, Municipal Health Commission, China, Hubei Province in December 2019, pneumonia in the urban center, Gradually, additional and additional folks fall sick who have constant symptoms in alternative countries. The COVID-19 pandemic has been existing for ten months all around the world. This epidemic attacks 215 countries and regions worldwide, like the USA, Spain, Italy, the United Kingdom, state, Germany, Brazil, France, Turkey, Iran, Canada, Peru, India, Belgium, European nations, the Republic of the peninsula, so on. People of all ages are affected by the novel coronavirus infection.

Most infected people have common gentle symptoms like throat pain, high fever, dry cough, head-ache, diarrhea, etc. However, these may vary from country to country and region to region within the country. In general, the symptoms of affected people exhibit out within fourteen days. Most transmission of the COVID-19 route is via metabolic process droplets in associate degree unprotected state and near contact with the infected person. The incubation period could also be infectious, which significantly will increase the problem of interference and control. Recent studies show that people with high immunity power have acting as an asymptomatic carrier for coronavirus. To prevent the virus from spreading, the Chinese government place up the "lockdown" live in Wuhan on twenty-three January 2020, a replacement approach edge infectious diseases. Other countries have followed suit. "Lockdown" means that home quarantine, waterproofing of the town from all outside for the interruption of the malady transmission. All educational institutions and businesses are closed. The public ought to observe home quarantine, keep social distance, stop gathering along, and even put in force to wear a mask once they depart for es-sential activities (Organization, 2020b). Although the pandemic has not been essentially controlled for a brief time after lockdown, it was proven to be beneficial management live, which significantly scaled the number of patients down, thereby reproducing the pan pandemic's harmfulness But; due to lockdown, the economy and Gross Domestic Product (GDP) of various countries have seriously affected. Since the current situation has a challenging time for every sector, this article gives a comprehensive review of the current educational institutions' present scenario worldwide and precautions taken during post-covid-19.

The term "education system" includes all establishments involved with youngsters, children, and adults. It mainly stages like Early childhood/Kindergarten, Primary, Lower Secondary, Higher secondary, Postsecondary non-tertiary, Short-cycle tertiary, Bachelor's, Master's, Scholarly person or equivalent level, and not elsewhere classified. The education system structure sometimes inside the nations in numerous regions/states and also varies among countries. Specific variations concern whether or not the young people/children area unit separated and chosen to travel to totally different colleges. Dividing into one or many college styles is also right when four years of schooling or elementary school. In some systems, the chances area unit opens at every college-style tip to continue throughout totally different tracks. In some scenarios, a minimum of throughout the prior nine years of schooling is way a lot of comprehensive.

2. EARLY CHILDHOOD EDUCATION

When a nation claims that youngsters measure its future, that nation must be attentive to the social ob-ligations underlying such an announcement. Any country and people that believe attention to children's care and education throughout the first years are of inestimable price to society would create each reason-
